LIST OF CONTENTS

NUMBER 1

Sampling, noise-reduction and amplitude estimation issues in surface electromyography
E. A. Clancy, E. L. Morin and R. Merletti 1

Short-latency stretch reflex modulation in response to varying soleus muscle activities
K. Ogiso, J. M. McBride, T. Finni and P. V. Komi 17

Stretch-reflex mechanical response to varying types of previous muscle activities
K. Ogiso, J. M. McBride, T. Finni and P. V. Komi 27

Estimation of the conduction velocity distribution of human sensory nerve fibers
G. Morita, Y. X. Tu, Y. Okajima, S. Honda and Y. Tomita 37

Statistical power and measurement allocation in ergonomic intervention studies assessing upper trapezius EMG amplitude. A case study of assembly work
S. E. Mathiassen, A. Burdorf and A. J. van der Beek 45

Relationship between antagonistic leg muscles co-contractions and body centre of gravity mechanics in different level gait disorders
F. Dierick, C. Domicent and C. Detrembleur 59

Effects of postural muscle fatigue on the relation between segmental posture and movement
E. Chabran, B. Maton and A. Fourment 67

NUMBER 2

Neuromuscular disorders associated with static lumbar flexion: a feline model
M. Solomonow, B. Zhou, R. V. Baratta, M. Zhu and Y. Lu 81

Evaluation of measurement strategies to increase the reliability of EMG indices to assess back muscle fatigue and recovery
C. Larivière, A. B. Arsenault, D. Gravel, D. Gagnon and P. Loisel 91

SEMG power spectrum changes during a sustained 50% Maximum Voluntary Isometric Torque do not depend upon the prior knowledge of the exercise duration
O. Maïsetti, A. Guével, P. Legros and J.-Y. Hogrel 103

Electromyogram median frequency, spectral compression and muscle fibre conduction velocity during sustained sub-maximal contraction of the brachioradialis muscle
M. Lowery, P. Nolan and M. O'Malley 111

Gender differences in active musculoskeletal stiffness. Part I. Quanitification in controlled measurements of knee joint dynamics
K. P. Granata, S. E. Wilson and D. A. Padua 119

Gender differences in active musculoskeletal stiffness. Part II. Quantification of leg stiffness during functional hopping tasks
K. P. Granata, D. A. Padua and S. E. Wilson 127

Variations in the relationship between the frequency content of EMG signals and the rate of torque development in voluntary and elicited contractions
M. Bilodeau, J. Houck, T. Cuddeford, S. Sharma and N. Riley 137

Automated localization of nerve damage: hypothesis, technique and performance appraisal
I. Yaar 147

Blink reflex in end-stage-renal disease patients undergoing hemodialysis
L. A. L. Resende, J. C. T. Caramori, P. A. T. Kimaid and P. Barretti 159

IOC-Olympic Prize 2002
B.M. Nigg III

NUMBER 3

SPECIAL ISSUE: Sensory function of ligaments

The sensory function of ligaments
M. Krogsgaard and M. Solomonow 165

Spinal and supraspinal effects of activity in ligament afferents
P. Sjölander, H. Johansson and M. Djupsjöbacka 167

Cruciate ligament reflexes
M. R. Krogsgaard, P. Dyhre-Poulsen and T. Fischer-Rasmussen 177

Shoulder reflexes
L. Diederichsen, M. Krogsgaard, M. Voigt and P. Dyhre-Poulsen 183

Reflex from the ankle ligaments of the feline
M. Solomonow and J. Lewis 193

Sensori-motor control of the uninjured and injured human ankle
L. Konradsen 199

Consequences of a ligament injury on neuromuscular function and relevance to rehabilitation — using the anterior cruciate ligament-injured knee as model
E. Ageberg 205

Afferent feedback in the control of human gait
J. B. Nielsen and T. Sinkjaer 213

Sensorimotor control of the spine
S. Holm, A. Indahl and M. Solomonow 219

NUMBER 4

Neither high-pass filtering nor mathematical differentiation of the EMG signals can considerably reduce cross-talk
N. A. Dimitrova, G. V. Dimitrov and O. A. Nikitin 235

Reduction of the muscle activity associated with self-imposed electrical stimulation of mixed nerves supplying lower limb muscles in man
L. Gerilovsky, D. Philipova and S. Georgieva 247

A motion of forearm supination with maintenance of elbow flexion produced by electrical stimulation to two elbow flexors in humans
A. Naito, M. Yajima, M. Chishima and Y.-J. Sun 259

Development of dynamic knee stability after acute ACL injury
T. L. Chmielewski, K. S. Rudolph and L. Snyder-Mackler 267

Upper-limb surface electro-myography at maximum supination and pronation torques: the effect of elbow and forearm angle
L. W. O'Sullivan and T. J. Gallwey 275

Neuromuscular fatigue of elbow flexor muscles of dominant and non-dominant arms in healthy humans
D. M. Williams, S. Sharma and M. Bilodeau 287

Influence of interelectrode distance and force level on the spectral parameters of surface electromyographic recordings from the lumbar muscles
B. Elfving, D. Liljequist, E. Mattsson and G. Németh 295

Electromyographic analysis of trapezius and sternocleidomastoideus muscles during nasal and oral inspiration in nasal- and mouth-breathing children
E. C. Ribeiro, S. C. Marchiori and A. M. T. Silva 305

Electromyography of trunk muscles in isometric graded axial rotation
S. Kumar, Y. Narayan and D. Garand 317

Influence of disposable, concentric needle electrodes on muscle enzyme and lactate serum levels
J. Finsterer, B. Mittendorfer, W. Neuhuber and W. N. Löscher 329

NUMBER 5

Amplitude-related characteristics of motor unit and M-wave potentials during fatigue. A simulation study using literature data on intracellular potential changes found in vitro
N. A. Dimitrova and G. V. Dimitrov 339

The differential effects of fatigue on reflex response timing and amplitude in males and females
B. D. Moore, J. Drouin, B. M. Gansneder and S. J. Shultz 351

Assessment of soleus motoneuronal excitability using the joint angle dependent H reflex in humans
I. S. Hwang 361

Soleus H-reflex dynamics during fast plantarflexion in humans
M. Fumoto, T. Komiyama and Y. Nishihira 367

Agonist–antagonist common drive during fatiguing knee extension efforts using surface electromyography
H. Mullany, M. O'Malley, A. St.Clair Gibson and C. Vaughan 375

The function of gastrocnemius as a knee flexor at selected knee and ankle angles
L. Li, D. Landin, J. Grodesky and J. Myers 385

Effect of PNF stretch techniques on knee flexor muscle EMG activity in older adults
R. Ferber, L. R. Osternig and D. C. Gravelle 391

EMG-angle relationship of the hamstring muscles during maximum knee flexion
H. Onishi, R. Yagi, M. Oyama, K. Akasaka, K. Ihashi and Y. Handa 399

Technical notes
Changes in kinematic and EMG variability while practicing a maximal performance task
D. A. Gabriel 407

Comparison of measurement accuracy between two wrist goniometer systems during pronation and supination
P. W. Johnson, P. Jonsson and M. Hagberg 413

Announcement: IOC-Olympic Prize 2002 421

NUMBER 6
PART SPECIAL ISSUE (pp. 423–478): History Dependant Properties of Skeletal Muscle

Considerations on muscle contraction
W. Herzog and R. Ait-Haddou 435

Force and motion generation of myosin motors: muscle contraction
R. Ait-Haddou and W. Herzog 425

Fundamental issues, recent advances, and future directions in myodynamics
H. Hatze 447

Effects of contraction history on control and stability in explosive actions
G. J. C. Ettema 455

History dependence of force production in submaximal stimulated rat medial gastrocnemius muscle
K. Meijer 463

Force enhancement following an active stretch in skeletal muscle
D. E. Rassier and W. Herzog 471

Time–frequency and principal-component methods for the analysis of EMGs recorded during a mildly fatiguing exercise on a cycle ergometer
V. von Tscharner 479

Differential joint coordination in the tasks of standing up and sitting down
D. S. Reisman, J. P. Scholz and G. Schöner 493
